

## **HEADING TO SUSTAINABILITY**

### **DAILY REPORT – DAY 10**

*Sunday, 24<sup>th</sup> March 2024*

After breakfast at 10:00, the activities started at the mayor's hall. The participants engaged in reflective discussions, evaluating their personal growth and the impact of the project on their understanding of digitalization and cultural exchange.

After lunch, we went back to the session room for some follow-up activities. We engaged to follow all the sustainable ways that we learned in all aspects of our lives.

After dinner, we had a closing ceremony in the evening. We revealed our secret friends and decided to write small letters to all the participants of the group. The ceremony marked the culmination of the project, celebrating the achievements and friendships formed over the past eleven days. Certificates of participation served as tangible reminders of the skills gained and the connections forged during the project.
