

## **SOCIAL INNOVATIVE ENTREPRENEURSHIP**

### **DAILY REPORT – DAY 10**

*Sunday, 11<sup>th</sup> February 2024*

After breakfast, we went to the room at Mayor's Hall for our morning session. We started by reading again the rules of the project and discussing if we followed them or not. We also looked in our fears and expectations, and we filled up the evaluation forms for the results of the project. We played some games and we talked about our feelings as it was the final day. We took pictures and scanned our final projects to use them for future use.

After the first coffee break, we continued with group discussions on integrating sustainability into project strategies. After the coffee break, we had the youth pass ceremony where the facilitator started explaining the ceremony. The first person on the pile of youth passes had to explain the characteristics of the next person without saying the name and the group had to guess the name of the person.

After lunch, we revealed our secret friends, and we wrote small love letters for everyone so they would remember the memories we created during the project. We cleaned up the session room

The night closed with a goodbye party.
