

## **TRAVELLING DIGITALIZATION**

### **DAILY REPORT – DAY 1**

*Friday, 1<sup>st</sup> March 2024*

The day went according to the program. After breakfast at 10:00, the activities started at the mayor's hall with energizers and team-building activities that set a positive tone for the project, fostering a sense of unity among participants.

After lunch, we talked about our fears, expectations, and contributions in the following days. Then we played human bingo with the task of finding participants who met the description. After the last coffee break, we decided on the rules of the project, we were split into groups for some chores of the day, and we went for dinner.

After dinner, we had the welcoming night where Anastasia explained more about the project. She made an introduction to the project objectives and the itinerary laid the foundation for the upcoming days, highlighting the importance of sustainability. Also, we had a small background check for the participating countries' reality on digitalization in general.
