

## **SOCIAL INNOVATIVE ENTREPRENEURSHIP**

### **DAILY REPORT – DAY 8**

*Friday, 9<sup>th</sup> February 2024*

After breakfast, we went to the room at Mayor's Hall for our morning session. We started the morning session with energizers and a team-building game.

After the first coffee break, we continued the day with field visits to local social enterprises and organizations so we could ask the owners about the reality of social and innovative entrepreneurship in real life.

After lunch, we come back to the major's hall for our evening session. We had some game session in the square playing football and volleyball as an energizer. We continued working on our projects and we discussed the final details of the idea like the logo, the colors and the advertisement strategy.

The night closed with a group discussion where we shared feelings and supported each other since today one of the participants had to leave urgently and this seemed to upset the group afterward some games and talks relaxed the vibe, and we finished the night with laughs.
