

HEADING TO SUSTAINABILITY

DAILY REPORT – DAY 9

Saturday, 23rd March 2024

After breakfast at 10:00, the activities started at the mayor's hall. We started the morning by picking a theme for the final presentations. Each theme was based on sustainability.

After lunch, we went back to the session room, where we presented the final results, discussed the results, and found ways to solve the problems that came up. All the presentations were food for thought, and they changed our minds in many different ways.

After dinner, we had the Portuguese cultural night, where the group cooked traditional dishes. Cultural nights doubled as innovation showcases, with participants presenting digital solutions inspired by their cultural heritage. Analyzing the intersection of culture and technology fostered creativity and innovation among participants. Participants exchanged ideas, formed partnerships, and expanded their professional networks, enhancing the overall learning experience.
